PROFILE

With 20 years of professional software engineering experience, I have developed software using C#, MS SQL, PostgreSQL, and REST API technologies. I have served as a Team Lead and Software Architect, building healthcare, CRM, and enterprise applications, and I continue to do so.

I focus on developing high-performance, scalable, cloud-based, and sustainable software solutions. By adhering to software architecture principles, keeping up with the latest technologies, and leveraging AI tools where appropriate to improve efficiency, I build modern software solutions. I have worked as a Senior Developer using both Waterfall and Agile methodologies.

I enjoy solving problems.

Software development does not end with delivering the product. Over the years, I have gained extensive experience in crisis management, problem analysis, delivering fast and permanent solutions, and effective time management. I am a team-oriented developer with strong problem-solving skills and the ability to quickly learn new technologies.

I enjoy continuous learning and actively follow emerging technologies.

Currently, I am focused on learning AI algorithms while also improving my skills in frontend and mobile development.

As a sociable person, I value making the best use of my time. Rather than watching TV, I enjoy electronics and RC (radio-controlled) hobbies. I also enjoy staying active through sports.

TECHNICAL SKILLS

Backend

- C#
- .NET 8
- ASP.NET Core Web API
- Entity Framework Core
- Dapper
- LINQ

Databases

- PostgreSQL
- Microsoft SQL Server
- Redis

Frontend

- React
- Next.js
- TypeScript
- JavaScript
- jQuery
- HTML5
- CSS3

Mobile

- Native Android Development
- React Native

External Tools

- Telerik Controls
- DevExpress Controls

DevOps & Tools

- Docker
- Git
- GitHub
- IIS
- Nginx

Notification Systems

- Ably

Architecture

- Clean Architecture
- Onion Architecture
- CQRS
- Repository Pattern
- Dependency Injection
- Microservices

Domain Expertise

- CRM
- Accounting
- ERP Systems
- Payment Systems
- Social Media
- WhatsApp Business API

Certifications

- Bilge Adam Software and Database Expertise (2012–2013)
- Kariyer Mimarı Android Development (2013)

Languages

- English: B2 (Reading, Writing, Speaking)

PROFESSIONAL EXPERIENCE

Infotec Bilişim

****Senior Full Stack Developer****

****01/2022 – 07/2026****

Responsibilities

- Developed and maintained cloud-based applications.
- Worked on both frontend and backend development.
- Designed and implemented new features, reporting systems, and backend services.

Projects

****Wease.io Lead Management System v1****

- Developed the complete frontend and backend of the cloud-based platform.
- Implemented WebRTC, reporting, Ably integration, and webhooks.
- Added video calling functionality using React.
- Developed calendar and reporting tools.

****Technologies****

- Backbone.js
- .NET Core 3.1
- Microsoft SQL Server
- Monolithic Architecture

****Wease.io Lead Management System v2****

- Developed features within a layered Microservices architecture using CQRS.
- Worked on reporting, Ably integration, and webhooks.
- Developed frontend forms using Next.js.
- Participated in the development of backend services for the insurance module.

****Technologies****

- .NET
- Microsoft SQL Server
- PostgreSQL
- Dapper
- React

Features

- Authentication & Authorization
- Dynamic Reporting
- Sales Tracking
- Task Management
- Project Management System

Mega Code

****Senior Full Stack Developer****

****09/2018 – 12/2021****

Responsibilities

- Developed enterprise web applications.
- Implemented new features.
- Fixed software defects.
- Analyzed customer requirements.

Projects

****Acente365 Insurance Platform****

- Cloud-based monolithic application.
- Developed frontend and backend.
- Built forms, reporting modules, background services, and notification systems.

****Sea365 Maritime Catering Portal****

- Cloud-based monolithic application.
- Developed frontend and backend.
- Built forms, reporting modules, background services, and notification systems.

****Dijipol Insurance Portal****

- Microservices-based backend development.
- Developed background services and notification systems.

Technologies

- .NET
- PostgreSQL
- Dapper
- React

Features

- Authentication & Authorization
- Dynamic Reporting
- Sales Tracking
- Task Management
- Project Management System

Additional Technologies

- .NET
- Microsoft SQL Server
- React

Akinsoft

****Software Development Team Lead****

****04/2018 – 09/2018****

Responsibilities

- Led the development of a cloud-based accounting software project.
- Successfully completed the beta version of the project.

Technologies

- .NET
- PostgreSQL
- Dapper

Features

- Authentication & Authorization
- Dynamic Reporting

Crt Yazılım

****Full Stack Developer****

****01/2014 – 04/2018****

Responsibilities

- Migrated the CRM application from Silverlight to ASP.NET MVC.
- Worked on both frontend and backend development.

Technologies

- .NET
- Microsoft SQL Server

Features

- UI Design and Development
- Backend Services
- Authentication & Authorization
- Dynamic Reporting

Additionally, I developed native Android mobile applications for software used by two law firms.

Emko Emaye

****Junior Developer****

****09/2009 – 12/2013****

Responsibilities

- Developed screens for the company's internal ERP software.
- Worked as a Junior Developer on an electronic smart board system.

Technologies

- .NET
- Microsoft SQL Server
